# Problem Identification

# What is the Problem?

## Job Search Issues

Job seekers waste hours daily sifting through thousands of irrelevant job postings, leading to inefficiency and frustration.

## Manual Scheduling & Notes

Professionals lose 10-15 minutes per meeting on manual scheduling, note-taking, and follow-up emails, impacting productivity.

## Hiring Managers Face These Challenges

- Manually screening hundreds of CVs
- Spending hours shortlisting candidates
- Back-and-forth emails for interview scheduling

## Negative Outcomes

Low productivity, burnout, and slower career growth for students and professionals.

**02**

**Solution Proposed**

# What is the Solution?

## Job Seekers

- One-time CV upload + preferred categories
- Auto job matching & one-click apply
- CV automatically sent to hiring manager

## Hiring Managers

- Post job (Title, Description, Requirements, Salary)
- AI extracts skills + ranks top applicants
- Auto notification: “This candidate is the top applicant”

## Shared Features

- Auto Google Calendar + Meet scheduling
- Voice recording → Whisper + Groq AI summary
- Auto follow-up emails + dashboard

# CareerFlow AI Outcomes

01

Saves time for both job seekers and hiring managers

02

Increases interview success rate & faster hiring

03

Everything organized in one dashboard (no switching apps)

**03**

Features

# Job Seeker Features:

01

## **One-Time Onboarding**

Upload CV once and select preferred job categories — no repeated work

03

## **One-Click Apply**

Apply instantly — your CV is automatically submitted to the hiring manager

05

## **Automated Interview Scheduling**

Receive Google Meet link + Calendar invite directly in your dashboard

02

## **Smart Job Matching**

Browse only relevant job postings that match your skills and preferences

04

## **AI-Powered Ranking**

Get automatically ranked among all applicants based on job requirements

# Hiring Manager Features:

01

## **Easy Job Posting**

Post jobs in seconds with Title, Description, Requirements & Salary Range

02

## **Automated Application Management**

Receive all applications in one dashboard with AI-extracted skills & email

03

## **AI Top Applicant Identification**

System automatically highlights Top Applicant(s) and sends instant notification

04

## **One-Click Interview Scheduling**

Select candidate → AI generates Google Meet link + adds event to Google Calendar

05

## **Smart Meeting Management**

Record interview → AI transcribes + generates structured summary with action items

**04**

# Hybrid AI Approach

# Generative AI Use

## Gemini API

Analyzes CV, extracts skills/experience, scores job matches (80–100% relevance), and avoids duplicate jobs

## Groq AI + Whisper

Real-time speech-to-text transcription + structured JSON summary (key points, decisions, action items with assignees & deadlines)

# Hybrid Advantage

## More accurate and useful

The hybrid approach makes CareerFlow AI far more accurate and useful than using a single AI model.

## Gemini and Groq collaboration

Gemini understands career profiles, while Groq creates smarter meeting summaries tied to job search.

## Automated follow-up tasks

AI automatically creates follow-up tasks and updates the job history in Firebase, ensuring seamless integration.

**05**

# Technology Stack

# Technology Used:

01

Frontend: React + TypeScript  
Backend: Express.js (Node.js)  
Database: Firebase (user data, jobs, meetings, history)

03

Integrations: Google OAuth, Calendar API, Gmail API, Google Meet  
Output: Auto PDF/Word download + scheduled emails

02

Speech AI: Whisper (speech-to-text)  
AI Models: Google Gemini API + Groq AI (LLaMA 3.3 70B)

04

Fully online, secure, and scalable  
No more switching between different apps

THE END

**Thank You**
